

BEYOND THE JOB

RE-IMAGINING CAREER PROGRESSION AND RETENTION

OBJECTIVES

- To streamline current Strategic Objectives as outlined in the 2024-2026 Strategic Recruitment Plan and the 2024-2026 Strategic Retention Plan into a unified framework.
- Unifying Recruitment, Retention and Progression (Career Mapping) into a holistic data-driven approach based on Employee Outcomes.

Employee Success Components

ALIGNMENT TO GOALS

Redacted

- I've identified two key objectives in both the Strategic Recruitment and Retention Plans that will better allow for establishment of a statistical baseline and key performance metrics of the identified goals.
- Instead of developing a baseline focused solely on recruitment, establishing a baseline approach based in ideal agency staffing will better align to the holistic approach being advanced by the Employee Outcomes data driven approach discussed in this presentation.

RECRUITMENT VS STAFFING

While the terms staffing and recruitment are often used interchangeably, they refer to different aspects of the talent acquisition process.

Recruitment is the process of actively seeking and attracting qualified candidates to fill job openings within an organization. In essence, **recruitment is a short-term, tactical process** focused on finding suitable candidates for immediate needs.

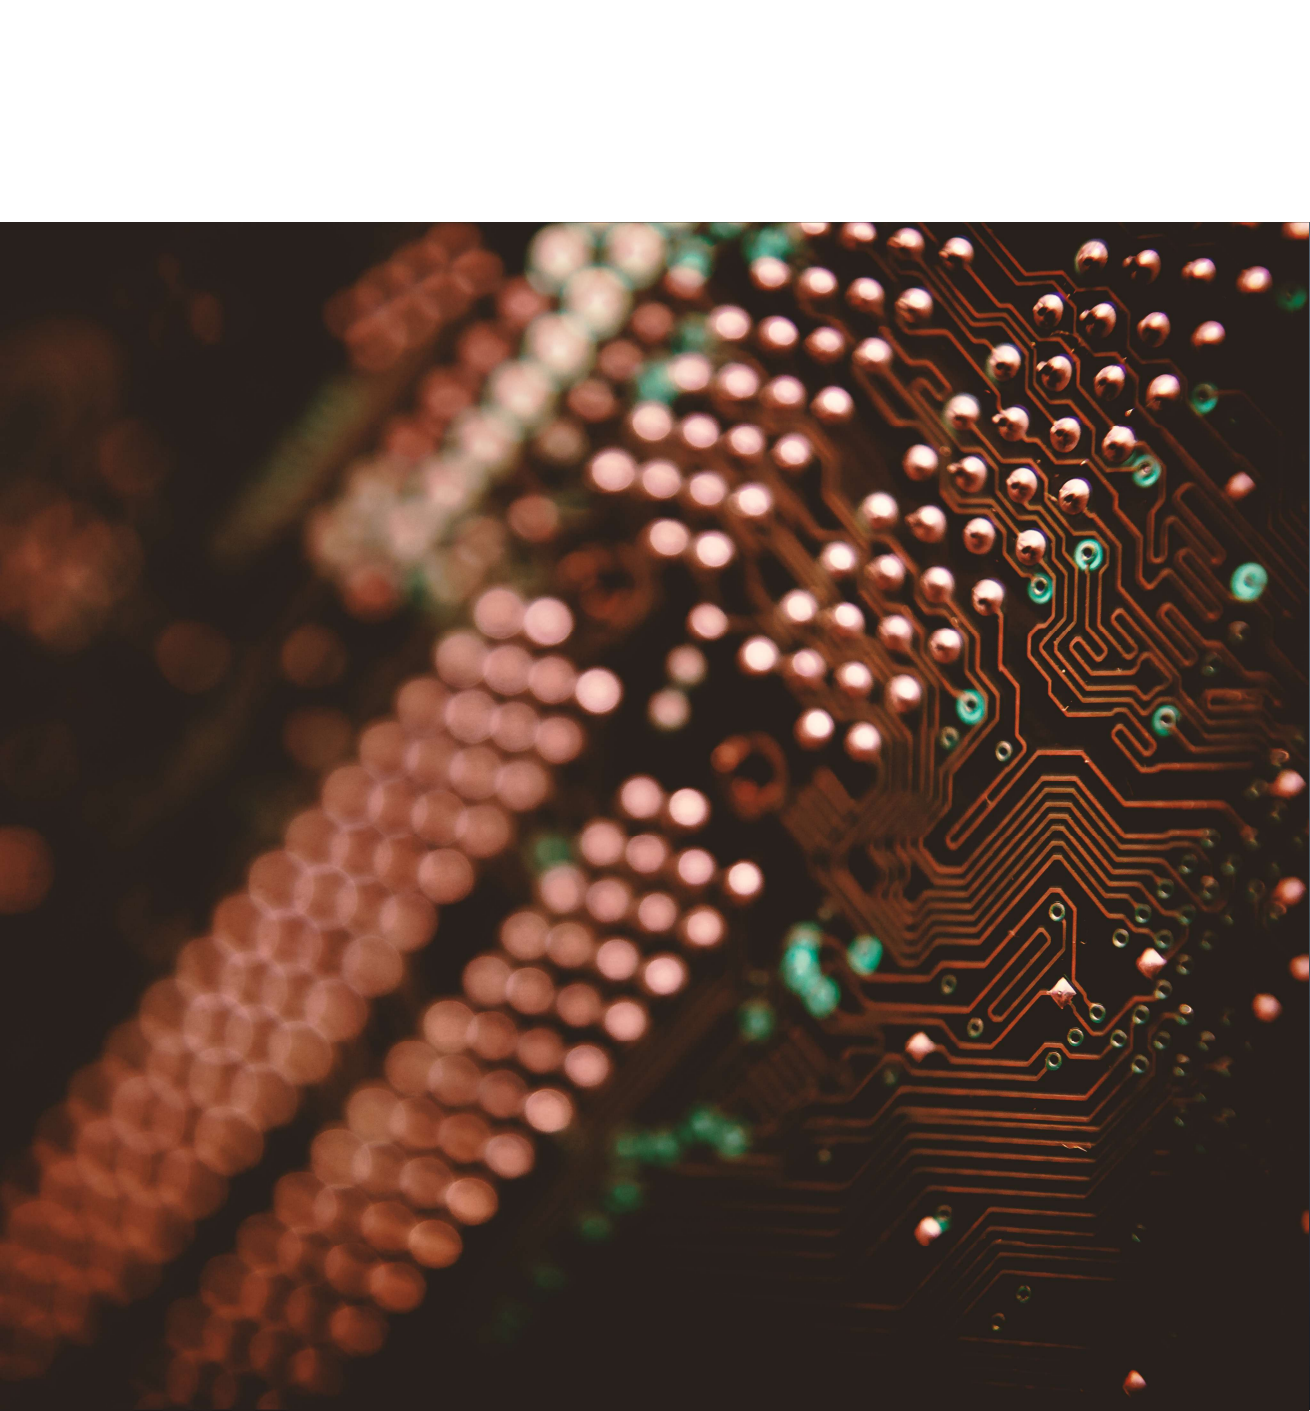

Staffing, on the other hand, is a broader, more strategic process that involves **managing the overall workforce** and ensuring that the organization has the right number of employees with the right skills at the right time.

EMPLOYEE OUTCOMES: MANAGING THE OVERALL WORKFORCE

- **Workforce planning:** Anticipating future talent needs based on organizational goals and business growth.
- **Talent management:** Ensuring the right balance between employee types.
- **Employee deployment and scheduling:** Optimizing the workforce to meet operational demands.
- **Retention:** Keeping employees engaged and motivated to stay **long-term**.

MEASURE METHODOLOGIES

Task
Completion

Management
by Objective

Hybrid

COMPLETION METHODOLOGY

Requires Assignments to be “tasked” in a work log. Think of how helpdesk tickets are handled. This format can be applied to any team.

Below is a link to an instance set up for
Redacted

Note – Item shown is a mock up.

The screenshot displays a SharePoint 'RSD Work Tracking Log' interface. On the left, a list of tasks is shown with status indicators: 'Complete-Retire', 'Complete', and 'Pending'. A large green-bordered box is overlaid on the center of the table, containing the text 'Summaries per entry placed here'. On the right, a table lists task details including Work Category, Assigned To, Start Date, End Date, and a count.

Work Cat...	Assigned To	Start Date	End Date		
Dashboarding	Camacho, Holley	10/21/2024	10/21/2024	1	No
Special Projects	Camacho, Holley	10/21/2024	10/22/2024	2	No
Dashboarding	Camacho, Holley	8/22/2024	8/15/2024	46	No
Automation	Camacho, Holley				No
Data Reconciliation (QA/QC)	Camacho, Holley	8/13/2024		64	No
Special Projects	Camacho, Holley	7/8/2024	7/18/2024	11	No
Special Projects	Camacho, Holley	7/9/2024	7/18/2024	10	No
Special Projects	Camacho, Holley	8/7/2024		70	No
SharePoint Updates	Camacho, Holley	8/7/2024		70	No

MANAGEMENT BY OBJECTIVE

Standard approach usually attached
to an annual review process.

HYBRID METHODOLOGY

COMBINES ASPECTS OF BOTH MANAGEMENT
BY OBJECTIVES AND TASK COMPLETION
METHODOLOGIES.

RECOMMENDED FOR ORGANIZATION
WOULD ALLOW US TO LEVERAGE CURRENT
ANNUAL REVIEW PROCESSES WITH EXISTING
INFRASTRUCTURE TO OPERATIONALIZE TASK
CAPTURE AND TRACKING METRICS.

Hybrid Methodology

Task Completion

Management by
Objective

RECOMMENDATIONS

- As mentioned, would recommend a hybrid approach.
- Would also recommend development of metrics by employee type.
